Relevant Experience

Service Engineer · **Fike Canada**

Nov 2024 – Present · Burlington, ON

- Perform routine inspections and troubleshoot Fike explosion protection systems, collaborating with clients to deliver timely, effective solutions
- Deliver on-site training programs for clients on system maintenance, safety procedures, and emergency response protocols
- Commission new Fike systems by installing modules and verifying compliance with design drawings and system requirements
- Maintain comprehensive technical documentation, including inspection reports and risk assessments, ensuring audit readiness

Undergraduate Research Assistant · **Biomaterials Lab**

Jan 2024 – Jun 2024 · Winnipeg, MB

- Collaborated with a multidisciplinary team to develop test methods and evaluate biosensor compatibility with foam dressings, including response times to the bacterial strains: E. coli, P. aeruginosa, and MRSA

R&D Engineering Co-op · **Agnora Inc.**

Sept 2022 – Dec 2022 · Collingwood, ON

- Designed and prototyped a gravity-fed filtration system for Dip-Tech printers, reducing waste disposal and saving ~\$10,000 CAD annually
- Collaborated with product and manufacturing teams to optimize glass tempering recipes, minimizing roller waves and visual distortion
- Conducted ASTM-compliant ball drop tests on laminated security glass at varying temperatures to generate impact resistance data
- Created 3D CAD models, assembly drawings, BOMs, and work instructions to support product development and lean manufacturing

Engineering Co-op · **Linde Canada**

May 2022 – Aug 2022 · Winnipeg, MB

- Redesigned the gas cylinder requalification process, achieving 100% compliance with internal safety protocols and federal regulations
- Developed a digital QMS to track gas cylinder inspections and analyze failure trends, enhancing quality control and reducing service errors
- Actively contributed to safety reviews and cross-functional meetings, aligning engineering solutions with business objectives

Education

University of Manitoba

Bachelor of Science in
Biosystems Engineering

Graduated: June 2024

Skills

Engineering Skills

CAD Modelling, Finite Element Analysis (FEA), Computational Fluid Dynamics (CFD), Rapid, Prototyping, Technical Documentation

Tools & Platforms

SolidWorks, AutoCAD, SAP, Autodesk Inventor, Tableau, ImageJ, VS Code, Minitab, Microsoft Office Suite

Programming Languages

Python, SQL, HTML, CSS, C/C++ (basic), MATLAB

Selected Projects

Penny Logic

Designed an algorithm to identify low-risk opportunities in structured data.

STEM Exhibit

Co-designed an interactive exhibit on sustainable aviation fuel; achieved 85% visitor satisfaction.

Certifications

First Aid & CPR, Valid Driver's License, WHMIS
